

Biomass Public Meeting

in coordination with

National Bioenergy Day

5:30 pm, October 17th, 2017

Murie Auditorium, UAF

In 2016, a Pre-feasibility study was awarded by the Alaska Wood Energy Development Task Group (AWEDTG) to study the biomass energy potential in four Fairbanks North Star Borough Schools.

The schools included in the study were: Pearl Creek, Two Rivers, Weller, and Salcha.

AWEDTG requires that a community meeting be held to allow the consultant to share the results with the community and solicit feedback.

Please join Amanda Byrd (ACEP), Ben Loeffler (FNSB), Samantha Reynolds (FEDC), Devany Plentovich (AWEDTG), and Lee Bolling (Coffman Engineers) as they present on the results of the prefeasibility studies.

This presentations will be followed by time for attendees to ask questions about biomass in the Fairbanks North Star Borough.

For more information on this presentation please contact Amanda Byrd at agbyrd@alaska.edu.

What:	Biomass Public Meeting and National Bioenergy Day
Why:	To present results of a biomass prefasility assessment for 4 FNSB Schools
Where:	Murie Auditorium, UAF West Ridge
When:	October 17th, 5:30 pm
Who should come:	Everyone interested in biomass energy and FNSB schools
How do I found out more?	Contact Amanda Byrd at agbyrd@alaska.edu
